Functions & Features

- Auto Timer Cut-off System
- Auto Temperature Cut-off System
- Auto Draining System
- Steam Aroma diffuser outlet
- Creep age protection
- 50 MM Thickness PUF insulation
- DRP (Dry Run Protection) for heating element safety
- Automatic pressure release valve to insure Steam Tank Safety
- Stainless steel (304 grades/16 Gauge) Steam inner Tank
- Scaling free steam for soft skin
- Flexible hose connector for water feeding
- Water level Sensor cut-off to ensure heater safety
- Stainless Steel made ALKALINE Heating element with KANTHAL wire
- Stainless Steel Sockets for long life of Steam Tank
- Wattage control through Control Panel to save more electricity consumption

- Digital display Panel for Time & Temperature display
- Bluetooth Music Player via your Android mobile phone (Optional)
- Heavy duty MS Made outer body with tefflon coating paint
- Steam Room Fog free Light operated by Control panel or Android App
- Digital Control Panel or WI-FI based Android Mobile Apps Operated system(Optional)

Health Benefits Of Steam Bath

- Promotes optimal breathing, and opens up nasal passages & promote sinus drainage.
- Soothes the throat.
- Cleanses the skin & Helps enhance skin appearance.
- Opens up pores & Lubricates the skin.
- Hydrates dry skin.
- Promotes an increase in blood circulation.
- Boost metabolism.
- Help to reinvigorate tired muscles.

SAUNA ROOM

The Heat from a Sauna smoothies your nerve endings and warms and relaxes muscles, in turn relieving the tension from your body and minimizing joint pain, This is especially beneficial for those who suffer from illnesses such as arthritis, painful, migraines and headaches.

Saunas can be used as means of calming the body and relieving it of stress, if you suffer from insomnia (one out three people have a mild case) it can also help induce sleep. The heat from the sauna helps the body release endorphin, a feel good chemical that reduces the effects the stress on the body which can relax you enough to sleep better, The Sauna heats up your body, so when you leave and begin to cool down, your body releases increased levels of melatonin, helping you feel more relaxed and therefore allowing you to have a deeper sleep.

Benefits of Sauna Bath

- Improving Blood Circulation
- Stronger Immune System
- Weight Loss
- Stress Relief
- Better Sleep
- Pain Relief
- Skin Cleansing
- Feeling Revitalized
- Social Interaction
- Sauna make the immune system stronger
- Sauna make hair look great

Accessories

How to Use

Step 1

Consume 250 ml of water or more before going into a sauna. Because your body loses water through sweat while in a sauna, this will help to restore moisture to the body.

Step 2

Wear clothing that is very lightweight and nonrestrictive. Clothing materials that “breathe” such as those that contain natural fibers such as cotton, are the best options, as they do not lock in heat and help to absorb the body’s sweat.

Step 3

Bring a towel with you to the sauna to provide a soft area on which to sit or as a moisture absorber for any sweat.

Step 4

Stay in the sauna for only 15 minutes if you have not used a sauna before or are not feeling well—for example, if you have an infection, cold or flu. Using a sauna for longer under these circumstances can result in heat stroke or loss of consciousness. If you have regularly utilized saunas, do not stay in for longer than an hour. If you notice you are feeling weak or suddenly fatigued, exit the sauna immediately.

Step 5

Wait several minutes before entering a cool shower or pool, or exposing yourself to cool outside air. This dramatic change in temperature following a sauna can place excess stress on your heart and cause your blood pressure to rise too quickly.

Step 6

Drink more water (at least 250 ml) following using a sauna in order to continue to replace lost water.

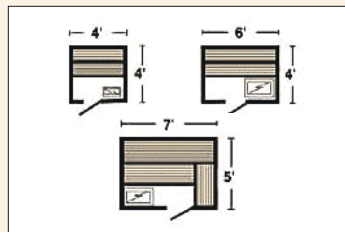

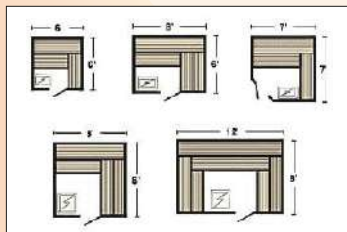

Warnings

Never use a sauna after you have been drinking alcohol or taking sedatives, as either behavior can lead to severe dehydration, dizziness and loss of consciousness. The same goes for after eating a heavy meal, as the sauna can interfere with digestion. Remove all jewelry prior to entering a sauna, as some temperatures can heat the jewelry to the point that it can burn the skin.
